ElastoThermTM Max

Roof Insulation

Product Information:

ElastoTherm Max is a closed cell polyisocyanurate thermal insulation panel with an integrally reflective foil facer and is compatible with Bitec roof membranes.

- Available in both flat and tapered panels
- Manufactured using a CFC-free, HCFCfree, and HFC-free foam blowing technology that has zero ozone depletion potential (ODP) and virtually no global warming potential.
- Available in both Grade 2 (20 psi) and grade 3 (25 psi) compressive strengths tested per ASTM C 1289.

Approvals:

- UL 1256 Insulated Metal Deck Constructions No. 120, 123, & 292
- UL 790 Roofing Systems Classification
- UL 263 Fire Resistance Classification
- UL 1897 Uplift Resistance
- FM 4450/4470 (refer to RoofNav for specific details)
- Florida Approved (FL17989)

ElastoTherm[®]

PolyIso Roof Insulation

Flat Panels:

- Sizes:
 - 。4ftX4ft
 - ₀ 4 ft X 8 ft
 - Thickness: 1 to 4 inches
- Refer to table 1 for flute spans and R value information

ElastoTherm Max

| Thickness | | LTTR | RSI | Flute Spanability | |
|-----------|-------|-------|------|-------------------|--------|
| in | mm | Value | | in | mm |
| 1.0 | 25.4 | 5.7 | 1.00 | 2.625 | 66.68 |
| 1.5 | 38.1 | 8.6 | 1.50 | 4.375 | 111.13 |
| 2.0 | 50.8 | 11.4 | 2.01 | 4.375 | 111.13 |
| 2.5 | 63.5 | 14.4 | 2.53 | 4.375 | 111.13 |
| 3.0 | 76.2 | 17.4 | 3.06 | 4.375 | 111.13 |
| 3.5 | 88.9 | 20.5 | 3.60 | 4.375 | 111.13 |
| 4.0 | 101.6 | 23.6 | 4.15 | 4.375 | 111.13 |

Table 1 - Thermal Data

| Physical Properties | | | | | | |
|---------------------------|--------------|-----------|--|--|--|--|
| Property | Result | ASTM Test | | | | |
| Compressive Strength, psi | 20 (grade 2) | D1621 | | | | |
| Dimensional Stability, % | <2 | D2126 | | | | |
| Water Absorbtion, % | <0.5 | C209 | | | | |
| Vapor Transmission, perm | <0.3 | E96 | | | | |
| Flame Spread | <75 | E84 | | | | |
| Smoke Developed | <450 | E84 | | | | |
| Density, pcf | 2.0 | D1622 | | | | |

Storage:

- Store panels flat and in a horizontal position to prevent damage.
- Store elevated (at least 3 inches) and covered to protect from environmental damage.
- Do not use wet or damaged panels.
- Refer to PIMA Tech Bulletin No. 109 for additional guidelines.

Installation:

- Panels must be kept dry from storage through installation.
 Install only as much as can be covered with roofing that day.
- When using multiple layers of insulation, joints should be staggered a minimum of 6 inches to prevent thermal bridging.
- Panels must be fitted neatly to the roof deck and with no more than a ¼ inch gap around penetrations.
- Panels should be abutted together and adjacent panels should have their joints staggered.
- New concrete decks must be fully hydrated and are no longer releasing moisture.
